## About IMS

Integrated Micro Sensors, Inc. IMS is a Research & Development company that focuses its efforts in the field of high efficiency, high strength microelectronic devices for the development of state of the art sensor technologies. Our products include Multi-Layer Ceramic Capacitors, Optoelectronic Chemical Sensors, Advanced Particle Detectors, and Instrumentation for Ultra-Fine Aerosol Research. To use our knowledge of wide-bandgap semiconductor technology, optoelectronics, and quantum electronics for the development and fabrication of multi-functional micro-integrated real-time sensors and structures for advanced applications in super-ambient environments.
